

Intro. Please visit each dashboard, test it and spend a few minutes with the presenter asking them to briefly explain their research. Ask them questions regarding their findings and methods used. If you feel like you cannot answer a question, please select the neutral option.

Note that this survey is a data-driven tool to gather feedback for students. This survey is not a formal assessment tool and no rights for your final grade can be derived from the results. The results are only visible for teaching staff and the presenter. The results are collected anonymously for all participants except for the teaching staff.
